---

overleaf just updated their gui, looks so much better now fr, and no, I won't miss the old one.

I love posters, especially the ones with nice figures and equation. There was a small conference from geoscience department today, and I was just there to check other people's poster lol.

I watched a lot of shows, movies and animes last summer mainly because I was bored lol. Well, I did got into a research internship and had to attend some stupid social events. So boring tho, like asking each other what you gonna do after you graduate, so stupid. They did pay me and gave me a single room with kitchen and fridge, so I really shouldn't complain too much. I probably will apply again next summer with a different PI cuz my current one is retiring(:cryemoji:). Really need more research experiences.

I actually didn't know anything about bsd before taking HUR235, so when I first hear the name Fyodor I was like huh??? and then he said I am crime I am punishment in the movie, like let's be real, that book isn't even that good, I only finished half and stopped reading not because I don't have time but it is just not that good.

They really should add Newton with his Principia or David Griffiths with his legendary Introduction to xxx series.

Less atsushi more chuuya pls. I really like first 3 episodes of season 4, wish Ranpo could outsmart all the masterminds one day. And like Fukuchi, I do not want to complain too much but they really should justify his actions in later seasons. I don't understand why he needs to die, he could achieve his goal with the one order.
