---

I always have a smile on whenever people my age are trying to explain their research to me, like bruh I already forgot 80% of high school bio or chem, I know nothing about quantum, a little about particle and nuclear, and don't care about how lasers work. My serious mode is only on when people are talking about their astronomy or astrophysics research. I also don't understand why people are interested in these fields, I mean I probably will do good in other fields if I really want to, but like why would I want to study number theory or pp collisions(yes, I know) when I can study things far beyond us.

All this time, I can't believe I couldn't see ~  
Kept in the dark, but you were there in front of me ~  
I've been sleeping a thousand years, it seems ~  
Got to open my eyes to everything ~  
Without a thought, without a voice, without a soul ~  
Don't let me die here ~  
There must be something more ~  
Bring me to life ~
