Phy405 is not for the weak bruh, quantum is not real, i still don't know why i take this class along with amo. Russian lit class also requires 30 pages a day but actually no compliant cuz I kinda enjoyed it, mamdani pls revive dostoevsky. i think im just unfit to teach ppl who are new to fencing, like i swear 80 percent of them have egos, not saying it's a bad thing, but it indeed makes me more and more annoyed when i yelled halt 1829391892391298312 times and they are still fencing like wtf. i cant feel next cycle, idk maybe bc i feel a lot safer now.
