hohoho happy new year???? merry christmas! i was planning to take physics gre tomorrow but nah, im applying for astronomy phd, i mean yeah physics gre could help(maybe?), but im just too lazy to study for it, also need to pay 200 bucks to take it, imagine that. i think my gpa is fine too, so ill just use the time to finalize my school list and send it to my letter writers.

ansatz is now my new favorite word, so cool, like Ansatz, peak name peak everything.

i would only be lying to myself if i say i dont miss you
