
Stupid class with unclear instructions, imagine 2026 and still using their own website for the majority of the class, no electronic hw submission. 8am class btw, need to print the stupid hw out and submit them, and then what, not allowed to take the hw quiz bc i was late for freaking 5mins, bruh the quiz is a question i can solve within 30secs, if H is hermitian then show that $u=\exp(iH)$ is unitary, like give this stupid question to kids in phy308 and most of them would be able to solve it under 3mins, stupid class, i dont want to be mean but mf didnt even mention WHEN there will be a hw quiz. yeah 'ill drop two lowest quizzes', im dropping 100s on the rest of the quizzes u bozo. Will farr also canceled his office hours today so i cant go to his office and ask him questions. im actually pissed today, very. what a horrible day. my opinions on ppl, or i should say anyone, unlike my mood, if it go below the x axis then it probably will stay there forever.
